## Corps of Engineers implements park improvement plan at Proctor Lake

The U. S. Army Corps of Engineers at Proctor Lake is in the process of implementing a park improvement program for Promontory Park, Corps officials announced today.

A long-term development plan has been developed for the park and construction on portions of the plan will begin this winter. Work scheduled includes the construction of screened shelters in one area of the park and the upgrading of all recreational sites in another area to accommodate the larger recreational campers which are popular today. Many other improvements are planned as funding becomes available to meet public demand.

In order to accomplish this work and reduce winter operations expenses, Promontory Park will be closed for six months beginning October 1, 2000.
